

## Linux Firmware Install

```
WORK_DIR=/usr/src/  
cd $WORK_DIR  
command -v rfind || ( echo -e "install  
rfind\nhttps://github.com/pauldreik/rfind.git" && exit 1 )  
command -v pre-commit || sudo pip3 install pre-commit  
  
git clone  
https://git.kernel.org/pub/scm/linux/kernel/git/firmware/linux-firmware.git  
pushd linux-firmware  
sed -i '/github.com\/ambv\/black/{n; s/rev: .*/rev: 24.1.1/;}' .pre-commit-  
config.yaml  
make check  
make install  
make dedup
```
