

Linux From Scratch - Version 12.1-systemd	
Chapter 9. System Configuration	
	/
Managing Devices	Configuring the Linux Console

9.5.

```

systemd-timed
.
가 UTC
.
UTC          가
7           .
systemd-timedated /etc/adjtime          UTC
.
가          /etc/adjtime

```

```

cat > /etc/adjtime << "EOF"
0.0 0 0.0
0
LOCAL
EOF

```

```

/etc/adjtime          systemd-timedated          가 UTC
가
timedatectl          가 UTC
systemd-timedated          :

```

```

timedatectl set-local-rtc 1

```

timedatectl

```

timedatectl set-time YYYY-MM-DD HH:MM:SS

```

```
timedatectl set-timezone TIMEZONE
```

가

```
timedatectl list-timezones
```

timedatectl
systemd

chroot
LFS

9.5.1.

```
systemd 213 NTP systemd-  
timesyncd  
NTP 가  
SNTP  
systemd 216 systemd-timesyncd  
:
```

```
systemctl disable systemd-timesyncd
```

```
/etc/systemd/timesyncd.conf systemd-timesyncd가 NTP  
가 systemd-timesyncd가
```
