

chroot

PS1

from <https://unix.stackexchange.com/questions/14345/how-do-i-tell-im-running-in-a-chroot>

```
## stat - Display file or file system status.
##
## -c --format=FORMAT use the specified FORMAT instead of the default;
##                      output a newline after each use of FORMAT
##
## The valid format sequences for files (without --file-system):
## %d  device number in decimal (st_dev)
## %i  inode number
##     root device, inode가 /sbin/init가      root

if [ "$(stat -c %d:%i /)" != "$(stat -c %d:%i /proc/1/root/.)" ]; then
    echo "We are chrooted!"
else
    echo "Business as usual"
fi
```
