

## chroot

from <https://unix.stackexchange.com/questions/14345/how-do-i-tell-im-running-in-a-chroot>

```
## stat - Display file or file system status.

## -c --format=FORMAT use the specified FORMAT instead of the default;
## output a newline after each use of FORMAT

## The valid format sequences for files (without --file-system):
## %d device number in decimal (st_dev)
## %i inode number

## root device, inode가 /sbin/init가 root
## PS1 normal chroot PS1 가

if [ "$(stat -c %d:%i /)" != "$(stat -c %d:%i /proc/1/root/.)" ]; then
    echo "We are chrooted!"
else
    echo "Business as usual"
fi
```
